CARE Series Match Assessment Results

This report displays assessment results that will help you better match caregiver to client. Please remember the information contained in this report is sensitive. Every effort should be made to ensure it is stored in a secure place. This assessment is designed to provide insight into a candidate's personality and interests. Matching decisions should not be based solely on the results of this assessment. It is intended to be used in conjunction with other information (e.g., client care needs and particular skills) to guide matching decisions. This assessment is not intended to be used as a hiring tool for candidates.

Assessment results are based on well-established items that focus on characteristics and interests most desired in caregivers. Results are presented on a continuum. Low scores suggest the caregiver has less intensity or interest in that area whereas high scores indicate a greater intensity or interest.

This report has been derived from the results of an assessment completed by the respondent and reflects the responses they made. This report is generated electronically, and there is no guarantee that it has not been changed or edited. The information within this report is likely to remain valid for 12 months, depending on the circumstances.
