

SilverSource Announcement – 2019

SilverStone Group is excited to announce a provider change for our SilverSource online risk management client portal taking effect on January 1, 2019. With this change active P&C clients of Silverstone Group will be able to access hundreds of no cost streaming videos and interactive online training titles, in addition to the electronic incident/OSHA recordkeeping system, document library and other features our clients have come to expect.

Clients who logged into SilverSource during 2018 will be automatically registered with access in this new system and will receive an automated e-mail complete with login information. If you'd be interested in learning more or to request access for yourself or your team, please reach out to your SilverStone Group account representative.
